

Prisha Agarwal

925-964-5321 | prisha.agarwal@berkeley.edu | www.linkedin.com/in/prishaa24 | U.S. Citizen

EDUCATION

University of California, Berkeley

B.A. in Computer Science and Applied Mathematics

Relevant Coursework: Object Oriented Programming, Data Structures, Discrete Math, Abstract Lin. Alg.

Berkeley, CA

Expected May 2028

EXPERIENCE

Snorkel AI

Software Engineer Intern

- Incoming Summer 2026

May 2026 – Present

San Francisco, CA

TurnPost AI

Machine Learning Engineer - Contract

- Developed 5 deterministic NLP pipelines for screenplay analysis using **spaCy**, **TF-IDF**, and **Logistic Regression**, replacing GPT-4 API workflows and reducing runtime 90% (30min → 3 min) at \$0 API per script
- Built pipelines for character relationship graph extraction, emotion detection (90% accuracy on human-labeled test set), plot structure analysis, genre classification (80-85% accuracy across 18 categories), and entity recognition
- Resolved critical character offset bug by replacing **str.index()** with **spaCy's ent.start_char** for accurate entity positioning across repeated names, achieving 1,969 passing tests and fully deterministic and reproducible output

Jan. 2026 – May 2026

Berkeley, CA

Youphoria

Data Director

- Wrote **SQL** queries to analyze user funnels, retention cohorts, and behavioral segmentation; defined and monitored **KPIs** including DAU/MAU, activation rate, and churn, analyzing trends and drop-offs for product improvements
- Performed **A/B tests** by measuring **conversion rate** and validating statistical significance before feature rollout

Jan. 2026 – Present

Remote

US Space

Market Strategy & Growth

- Led **market research** and strategic **rebranding** to reposition US Space for investor fundraising, rebuilding the **investor pitch deck** end-to-end to translate technical vision into an investor ready narrative
- Secured letters of intent from partner companies, supporting early **go-to-market** strategy and seed fundraising

Aug. 2025 – May 2026

Berkeley, CA

Krypton Consulting Inc.

Software Engineer Intern

- Built a secure authentication frontend with **React + Vite** and **Supabase Auth**, enabling gated access to an AI chat platform through email/password login, **OAuth** (Google / Facebook / Apple), and **password reset** flows
- Implemented persistent sessions via **Supabase JWT** storage with a **Remember Me** toggle that signs users out on next app load when unchecked, and deployed to **Vercel** for production

Dec. 2025 – Jan. 2026

Newark, CA

San Jose State University

Machine Learning Researcher

- Improved response relevance of LLM outputs by building a **Retrieval-Augmented Generation (RAG)** pipeline using **LangChain**, **OpenAI Embeddings**, and **ChromaDB** as the vector store, enabling **semantic retrieval** over domain-specific documents for accurate responses to real-world queries grounded in retrieved evidence
- Evaluated trustworthiness and interpretability of ML systems by conducting 20+ literature reviews/case studies on **Explainable AI (XAI)** studies across healthcare, finance, and law to identify deployment risks and best practices

Mar. 2024 – Aug. 2024

San Jose, CA

PROJECTS

Pebble | *React, Python, ML, Computer Vision, VAPI (Voice Agent), MediaPipe, XGBoost, YOLOv8* Oct. 2025

- Built an intelligent study companion with a Pomodoro timer that tracks **behavioral signals** (including gaze, posture, hand movement, and phone usage) to detect loss of focus and deliver real-time voice reminders via **VAPI**
- Trained an **XGBoost** classifier on 4,000 self-collected labeled frames using **MediaPipe** facial landmarks, head pose estimation via **OpenCV solvePnP**, and **YOLOv8** phone detection to output a real-time 0-100 focus score
- Built a **Flask** REST API backend serving live focus scores to a **React + TypeScript + Zustand** frontend, with **Flask-CORS** enabling camera processing and API request handling across the CV pipeline and browser

Gloss Over Mobile App | *Swift, UI/UX Design*

Jul. 2024 – Aug. 2024

- Built a structured **Swift** interface with **dynamic navigation** and search features, allowing users to quickly browse curated public-speaking resources through selected personalized improvement pathways

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, TypeScript, Java, Swift; React, Flask, spaCy, XGBoost, LangChain

Developer Tools: Git, AWS, GCP, OpenCV, ChromaDB, Supabase, SQL, Figma, VS Code
